Spikes need to morph from all pointing up to all pointing down

Halfway through transformation, spikes need to be completely flat with rest of bracelet so that the surface is one continuous flat surface.

We can integrate stacked shape keys, where the first one can end with the spike being flat and the second one reversing the direction of the spikes.

#### Default dimensions:

Spike height: 15mm  
Spike width: 6mm  
Bracelet inner diameter: ~55mm

#### Sliders:

1-4. Morph each individual spike  
5. Scale size of bracelet from 55mm inner diameter to 70mm inner diameter
